

# National Omnibus Survey

## Top Lines

August 30, 2023

### Methodology

American Strategies and Statara designed and administered this multi-modal survey. Data were collected through a randomly selected online non-probability panel sample provided by Dynata Research and Qualtrics links delivered via MMS. The survey reached 1,121 adults, age 18 or older. The survey was conducted August 15-30, 2023.

Sixty-five percent of respondents were reached through the non-probability panel sample and thirty five percent via MMS message. Quotas were assigned to reflect the demographic distribution adults age 18 and older in the United States. The overall margin of error is +/- 2.9%. The margin of error for subgroups is larger and varies. Percentage totals may not add up precisely due to rounding.

### ENERGY

**Variable Name:** EDLL

**Question:** Most fossil fuel pipelines run across privately held land. Companies pay landowners for the use of the land through something called a land lease agreement, which is a private transaction between the company and the landowner where the owner is paid for the use of his or her land. This is how most pipelines are constructed.

Does this information make you (ROTATE) more or less likely to support the construction of a fossil fuel pipeline, or does it make no difference to how you feel?

	Count	Percent
Total Answering	992	100.0%
Much more likely	220	22.2%
Somewhat more likely	423	42.6%
Somewhat less likely	255	25.7%
Much less likely	94	9.5%
